

Now That You've Reopened Your Practice, Don't Let Hackers Shut Your Doors.

Virtual Meeting Friday, June 26th from 3pm-4pm

CE Credits: 1 hr.

AADOM Members: No Charge

Non-AADOM Members: First Meeting Free!

Please join Gary Salman, CEO of Black Talon Security, to learn best practices on how to protect you from cybercriminals.

You will leave the webinar with a complete understanding of the importance of securing your network and what you can do NOW to avoid being shut down from a cyberattack.

Key learning points:

- ❖ Why hackers are targeting IT companies...ultimately resulting in a breach at your practice
- ❖ How to better secure your network from cybercriminals
- ❖ Understand why IT companies can leave you vulnerable to an attack
- ❖ Best practices you can put into place now

Gary Salman, Chief Executive Officer
Black Talon Security, LLC
BA, Business Administration
– Muhlenberg College

As the CEO and co-founder of Black Talon Security, Gary is dedicated to data security and understanding the latest trends in the industry, particularly as they relate to the healthcare field. He has a proven executive management track record and over 30 years of experience in software development and computer IT.

Gary also speaks nationally on cybersecurity threats and their impact on the dental community. He has trained thousands of dental offices across the U.S. on how to maintain “best practices” in cybersecurity and has been featured in over 30 local and national publications.

In addition, Gary has over 15 years as an instructor at West Point and he is also involved in law enforcement.

Black Talon has been called in to assist with many large ransomware and data breach attacks across the United States.
