

Pearls of Wisdom

Thursday, October 7th from 6pm-8pm

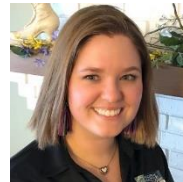

CE Credits: 2 hr.

AADOM Members: *No Charge*

Non-AADOM Members: \$30

Come and learn about the tips and tricks for OSHA we learned from 2020 and implemented for a better day and a better you.

Safety in the Work Place with Respiratory Safety and COVID.

Amy Ayers graduated Dental Hygiene school in 2005 with a Bachelor of Science from Western Kentucky University. She spent 8

years in private practice, focusing on total body health in general practice settings. When the opportunity presented itself to make the transition to education, Amy jumped at the chance to instill a love of dental hygiene in young people. She enjoyed a rewarding 6-year career, and the trust-based relationships made with her students are her favorite part of the experience.

She joined MPS in 2019 and is excited to further her knowledge of HIPAA and OSHA regulations. Despite her busy schedule consulting and lecturing, she enjoys volunteering with different associations in Middle Tennessee.

Amy keeps current by attending meetings and reading evidence-based publications, and she is a member of a number of professional organizations.

She resides in Hartsville and spends her free time cooking and gardening.
